Providence, R. I.

Gentlemen:

In the very near future I will receive from Mexico a large consignment of beautiful "Juarez" coins. - These coins are in practically mint condition.

Will you kindly advise me if you are in the market for coins of this kind, and if so, what would be your offer on each of the coins listed below.

As you know, these are revolutionary coins - which were produced in the independent state of Oaxaca - during the governorship of Jose Davila in 1915, and are - the series of many denominations and patterns, and therefore these coins today are very scarce, even in Mexico.

The denominations which I expect to receive are as follows:

Gold: 60, 20, 10, and 5 pesos.

Silver: 5, 2, 1, pesos and 50 and 20 centavos.

Copper-round: 20, 10, 5, 3 and 1 centavos.

Copper-square: 1 and 3 centavos.

I will appreciate if you will advise me regarding the above at your earliest convenience.

Also, will you kindly advise me if you publish monthly lists or catalogs relating to coins in general.

Thanking you in advance for an early reply, I remain,

Yours very truly,

FOREIGN DEPARTMENT

Gentlemen:

A letter of yours of March 13th addressed to the Arnold Numismatic Co., Providence, R.I. has recently been handed to us, as being of possible interest.

Did you ever receive, and have you on hand, any of the coins mentioned in your letter, which were made in Oaxaca in 1915? We should not be interested in sets but in certain pieces. If you still have such pieces and they are for sale, kindly let us know.

Very truly yours,

Curator
